

Glasgow Global Storylines Project

Global Citizenship, creative learning
and critical thinking across the curriculum

Event Guide:

Global Storylines is an exciting, innovative three-year project in which Storyline and Drama are used to embed an exploration of global issues into the learning experiences of pupils in Glasgow. Now in its second year, teachers from 17 Glasgow primary schools are exploring challenging global issues with their pupils, within the safe fictional community that Storyline offers. Each Global Storyline uniquely combines Global Citizenship methodologies with both the pedagogies of “Storyline” and the associated pedagogies of process drama. Learners are supported to think creatively, make connections, solve problems, and examine values and attitudes.

The event will be introduced by Steve Bell, Co-creator of Storyline, followed by a presentation by the Global Storylines Team on the scope of the project, the methodology, learning contexts and research findings. Displays and videos of children’s work, and presentations from the project teachers, help to give a flavour of the project.
